- ▣ Folding doors are produced from laminated finger joint pine, which gives better shape and stability.
- ▣ Timber can be painted in any RAL or NCS colour to satisfy costumers' vagary. We give you an option to choose different colors inside and outside.
- ▣ Extra value and style can be created by choosing glass unit from the wide range of options (laminated, toughened, bioclean, thermofloat, etc.).
- ▣ Glass thickness: from 26 up to 36 mm.
- ▣ Available with aluminium cladding on the outside.
- ▣ All hinges and handles are made from stainless steel.
- ▣ The door is supplied with internal cylinder lock as standard.
- ▣ Also external lockable handle is available.
- ▣ Horizontal ventilation is available.
- ▣ The door is delivered completely ready for installation.
- ▣ Doors ensure silent shutting and insulation from noise.
- ▣ Will fold outside of the room, to the left, the right, or split to fold on both sides.
- ▣ Effortless operation

## Advantages:

- ▣ Folding doors separating indoor and outdoor spaces bring those two worlds closer. When wide opened, they create a seamless lane from interior to the exterior of a home. The entire space will be open unlike with sliding doors that open only half of space.
- ▣ Any number of panels can be connected in long trains that allow over 90% of the profile to be opened.
- ▣ Either an even or uneven number of panels can be chosen what allows doors to fit any size of doorways.
- ▣ Implemented twinpoint lock gives not only design beauty for the folding doors but it provides high level of security as well.
- ▣ Complete combined threshold (merbau with aluminium).
- ▣ Folding doors are durable.

## Wooden folding door horizontal and vertical cuts
